

Network Presence, LLCSM

Innovative Security SolutionsSM

Company Overview

WHO we are:

Network Presence is a leading professional services firm specializing in designing and implementing solutions in the area of information security. Our consultants are recognized as the technology industry's most skilled and knowledgeable architects of security design, training, and risk assessment. As such, we are the preferred information security provider to many Fortune 1000 companies, government and intelligence agencies, banks, universities, entertainment entities, and major insurance providers.

WHAT we do:

We provide custom and comprehensive security packages by planning, designing, and implementing the most innovative and effective solutions available. Our consultants will work with your staff to create a complete security policy. We will assess your network's vulnerability through penetration testing, implement a solution, and monitor your network security's effectiveness through intrusion detection. We provide a vast range of services including:

- Security design and architecture
- Risk management and assessment
- Penetration testing
- Security policy development
- PKI design and implementation
- Firewall deployment/configuration
- Intrusion detection deployment/configuration
- VPN integration/implementation
- Virus protection
- Unix/NT system administration and networking
- Managed security
- 24x7 customer support
- 24x7 incident response
- Technical training
- Executive briefings
- Seminars and speaking engagements

WHY Network Presence:

Network Presence is focused on providing world-class expertise to customers who are on the cutting edge of their industry. Our consultants are recognized leaders in the area of information security and regularly participate in the Internet standards bodies, develop open-source software, provide seminars and training, and author technical white papers. It is our in-depth understanding of the technology coupled with our customized approach and commitment to client confidentiality that distinguishes us as the market leader.

HOW we can help:

Our goal is to enable your business to focus on profitability and productivity. As "technology enablers" we work side by side with you. We strive to understand your business needs, determine the risks of the project, empower you to make an informed decision, and provide expertise to implement a solution. Our approach to security is based on comprehensive auditing and testing that provides empirical verification that security goals have been met.

WHERE you go from here:

CONTACT US... and let us share our wealth of knowledge with you. We are headquartered in Los Angeles, California. With consultants strategically placed throughout the country, we are available for projects and training nationwide and around the world.
